(54) **AUTOMATIC AUCTION PROCESSING SYSTEM**

## (57)Abstract:

**PURPOSE:** To improve service to buying attendants and to improve the propriety of market prices by allowing a buying attendant to simultaneously join to plural auctions.

**CONSTITUTION:** This automatic auction processing system is provided with plural tendering machines K for sending tender signals for tendering the auctions operated and listed by respective buying attendants, plural auction operating devices S arranged in respective plural auction places to execute prescribed auction processing based upon the tender signals and bidder's operation and plural display boards D for displaying auction information relating to articles set up and listed correspondingly to the devices S, and each machine K is provided with plural tendering buttons B for generating tender signals correspondingly to respective devices S and a tender signal transmitting means for transmitting tender signals based upon the buttons B to respective devices S individually and in parallel. When a card C for identifying a buying attendant is inserted into one of the machines K and the number of tenders is set up in a number of tenders setting part N and corresponding tender buttons B are depressed, auctions relating to plural devices S can be simultaneously tendered only by one tendering machine K.

## LEGAL STATUS

[Date of request for examination]	19.03.1996
[Date of sending the examiner's decision of rejection]	30.09.1997
[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]	
[Date of final disposal for application]	
[Patent number]	
[Date of registration]	
[Number of appeal against examiner's decision of rejection]	0918465
[Date of requesting appeal against examiner's decision of rejection]	29.10.1997
[Date of extinction of right]
